

# USP MTN PRO ETHYL ALCOHOL 70%

MTN PRO ETHYL ALCOHOL 70% is a hydroalcoholic solution for disinfecting, degreasing and cleaning surfaces of all kinds.

Product features:

## Wide Coverage

Unlike the more conventional packaging, the advantage of the spray can is its wide coverage. With a 400 ml container you can clean and disinfect a surface of 15m2. Aerosol microparticles cover the surface very evenly and safely.

## Ease of use

With just one press on the valve, the alcohol permeates all kinds of surfaces and corners, guaranteeing their disinfection. The microparticles do not compromise delicate surfaces such as computer screens, keyboards, or cell phones. For use on window panes, methacrylate, motorcycle visors, etc., we recommend drying with a cotton cloth to guarantee the transparency of these surfaces.

## Sanitizes quickly

Its rapid evaporation shortens cleaning intervals between uses: restaurant tables, furniture and instruments for hairdressers, waiting rooms, public transport, etc. Surfaces will be ready for use within moments, without the need to wipe the product off.

### Universal usage

The product can be used to sanitize all kinds of surfaces, both for day-today personal and professional uses. Since it's not being a medical product, its formula does not pose any risk to the skin.

### 5 year guarantee

The aerosol is an airtight container that keeps the characteristics of the product intact much longer than conventional containers. MTN PRO Ethyl Alcohol 70% has a 5 year guarantee.
